<b>Status:</b>	Professional internship	<b>Approved on:</b>	
<b>Places of assignment:</b>	Yaounde and Douala		
<b>Coordination:</b>	Human Resources Director		

### 1. JOB OBJECTIVES

Join the team of the leader of the Telecommunications industry in Cameroon and give new impetus to your career!

You are you dynamic, persistent, you possess strong business acumen, and you are autonomous? Then this opportunity is for you!

We are offering Professional Internships

As an FTTH Technician, you will play a key role in FTTH customer installations, network expansion and decongestion, as well as the maintenance and troubleshooting of fiber optic infrastructure and equipment, directly contributing to improving the customer experience and expanding the company's FTTH network.

### 2. PRIMARY FUNCTIONS

- Centralizing and executing work orders (FTTH installations, fault reporting, terminations, network extensions and decongestion) submitted by commercial establishments;
- Processing technical requests received from commercial establishments as quickly as possible;
- Performing qualification tests on access points, line equipment, and customer environment compatibility (power supply, air conditioning, grounding) before work begins;
- Cabling of the physical FTTH installation (fiber pulling, connection, installation, and patching) and configuration of equipment at the customer's premises;
- Technical management of subscribers through connection nodes (PC/FAT and equivalents);
- Software configuration and commissioning of equipment installed at the customer's premises;
- Activation of services and benefits subscribed to by the customer;
- Diagnosis of the causes of malfunctions and resolution of incidents as part of fault reporting;
- Detection of access congestion and technical resource outages, and contribution to decongestion efforts;
- Production of a detailed daily report of interventions performed.
- Other related tasks as required.

### 3. ACADEMIC TRAINING

- Hold at least a Technical Agent Diploma in the fields of:
  - Telecommunications; • Networks and telecoms; • Electrical engineering; • Computer science (networks); • Or any other related technical field.

#### 4. EXPERIENCE, COMPETENCIES AND APTITUDES

- Be in good physical condition and fit for fieldwork;
- Demonstrate rigor, discipline, and a strong sense of responsibility;
- Possess analytical skills for diagnosing and resolving incidents;
- Be able to work effectively in a team and under supervision;
- Be available, responsive, and service-oriented;
- Proficiency with computer tools and technical applications (an asset);
- Bilingualism (French/English) is an asset.

#### 5. ACCOUNTABILITY

The employee will be responsible for:

- Performing tasks in a professional manner at all times;
- Providing updates to his immediate superior on a regular basis regarding the activities under his responsibility;
- Submit activity reports on time;
- Notifying the immediate superior of any problem that may affect the profitability and finances of the company.

#### 6. WHAT WE OFFER

- A monthly internship allowance;
- Technical and professional supervision;
- A stimulating and educational work environment;
- An opportunity to develop practical skills in FTTH;
- A fixed-term contract opportunity after 6 months for top performers.

#### 7. HOW TO APPLY?

- Deadline for submission of application files: January 25<sup>th</sup>, 2026 at 3:30 PM.
- Composition of the file:
  - A stamped job application;
  - A cover letter;
  - A curriculum Vitae;
  - A copy of relevant diplomas;
  - A copy of the relevant certificates and certifications;
  - Photo ID.
- Applications will only be accepted online via the following link: <https://camtel.cm/?>
